How to identify which user is logged-on to a device from Endpoint Manager

You can find out who is logged in to a device from the 'Device List' and 'Antivirus' interfaces:

- Open Endpoint Manager > Click 'Devices' > 'Device List'

  OR

- Open Endpoint Manager > Click 'Security Sub-Systems' > 'Antivirus' > 'Device List'

Click the following links for more details on each method:

Device list interface

Antivirus interface
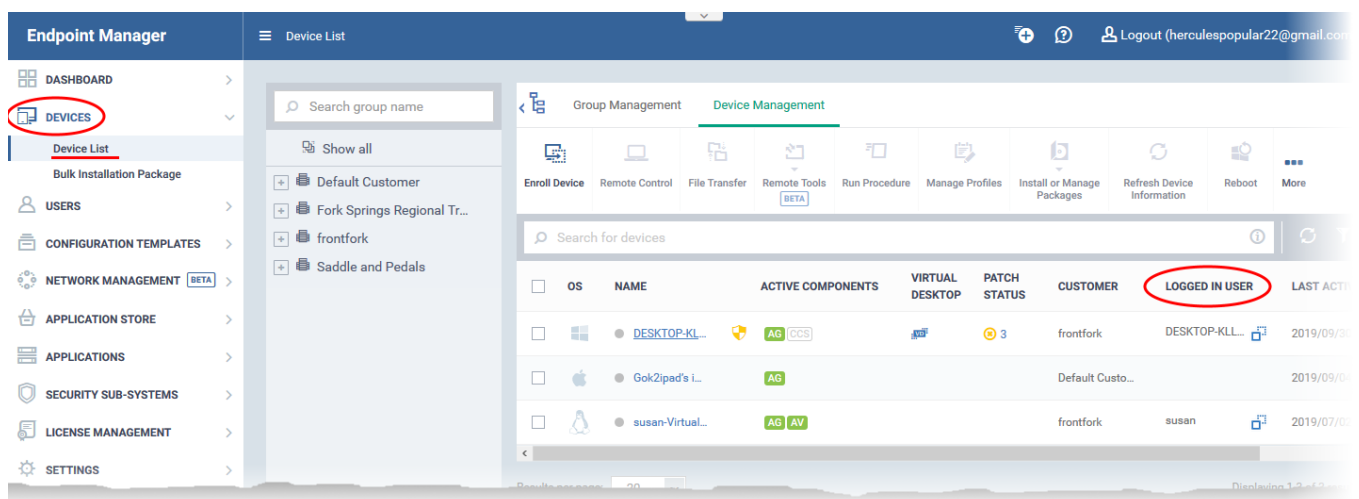

Device List interface

- Open Endpoint Manager

- Click 'Devices' > 'Device List'

- Click the 'Device Management' tab above the main configuration pane

  - Select a company or group to view only their devices

    OR

  - Select 'Show all' to view every device enrolled to Endpoint Manager

- The 'Logged in user' column shows who is currently signed-in to the device:

Antivirus interface

- Open Endpoint Manager

- Click 'Security Sub-Systems' > 'Antivirus'

- Select the 'Device List' tab

    - Select a company or group to view only their devices

    OR

    - Select 'Show all' to view every device enrolled to Endpoint Manager

The 'Logged in user' column shows who is currently signed-in to the device.

- The username is prefixed with the active directory (AD) domain, workgroup, or individual device that the user is logged-in to:

- **Active Directory** - Name is shown as <AD domain name>/<user name>

- **Workgroup** - Name is shown as <workgroup name>/<user name>

- **No network** - Name is shown as <device name>/<user name>

Click the icon to copy the username to the clipboard.

Note. The logged-in user is not necessarily the device 'owner' (the person to whom the device is assigned in the Endpoint Manager).
