

# How to open CCS on a local endpoint

There are five ways to open Comodo Client Security (CCS) on an endpoint:

- [Windows Start Menu](#)
- [System Tray icon](#)
- [Desktop shortcut](#)
- [Widget menu](#)
- [Windows Defender Security Center](#) (Windows 10, v.1703 and above)

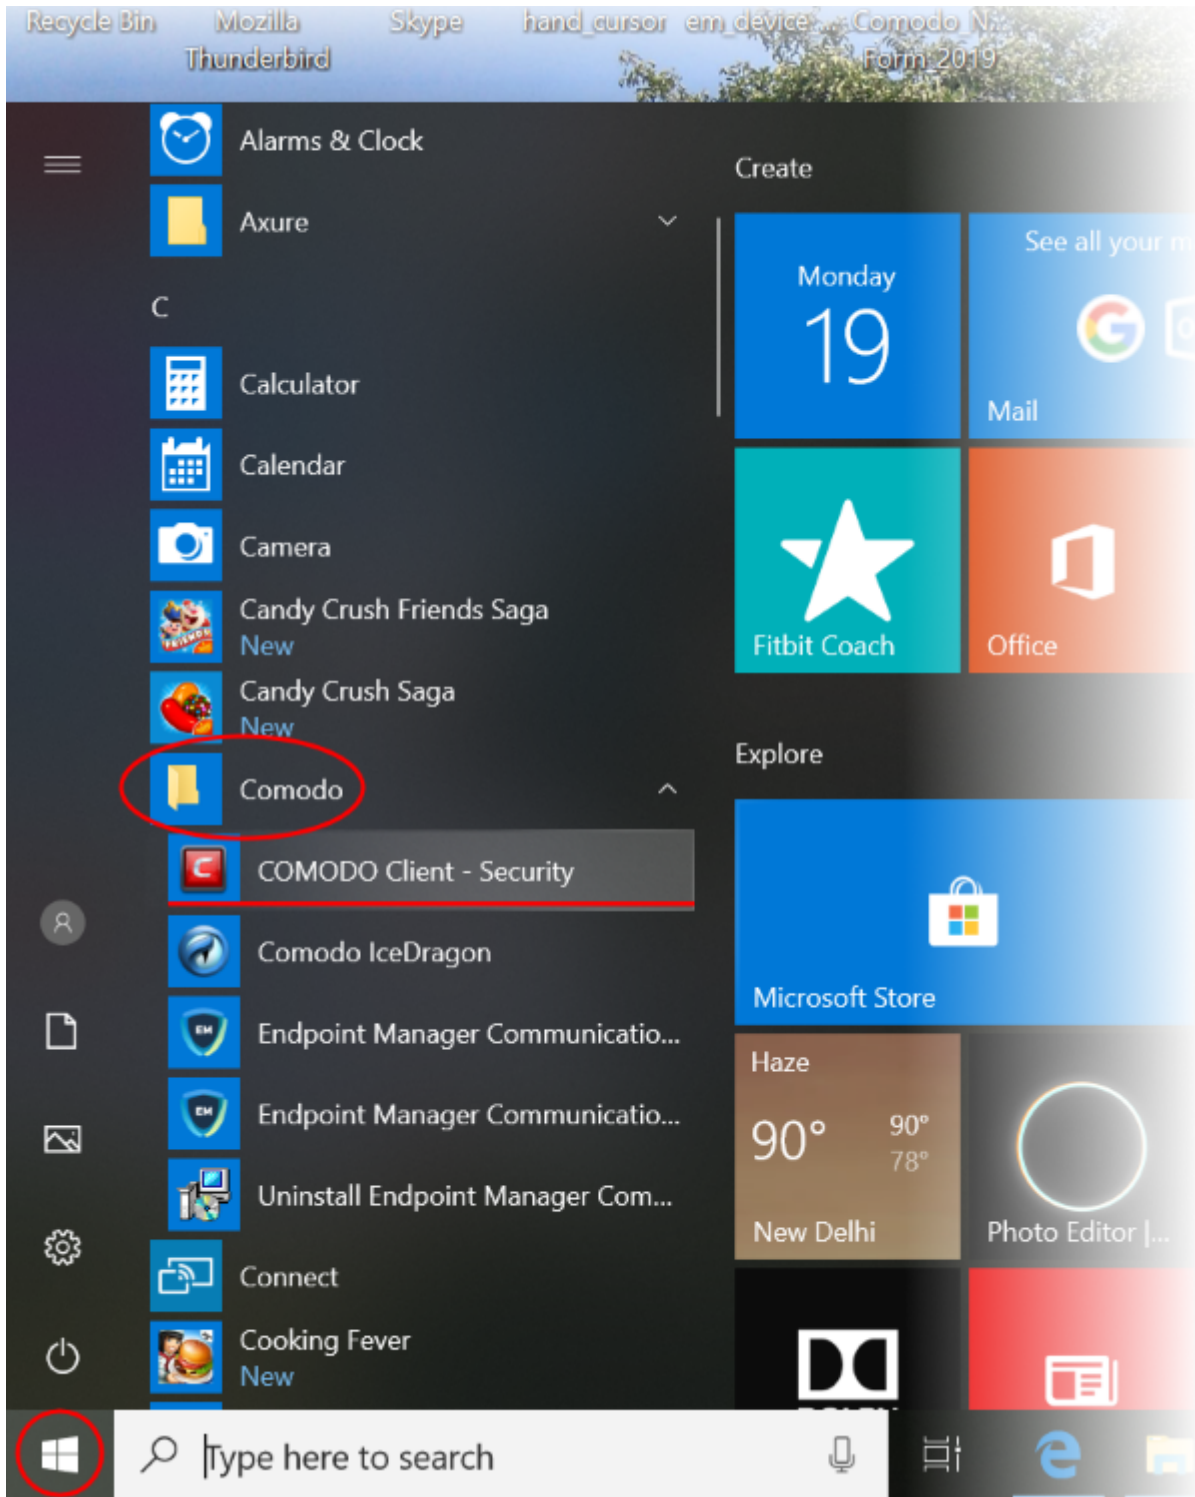

Note: The shortcut, tray icon, and widget are only shown if enabled in the 'UI Settings' section of the device profile.

See

<https://wiki.itarian.com/frontend/web/topic/how-to-re-brand-comodo-clients-and-the-virtual-desktop-and-configure-ui-settings> for more details.

## Start menu

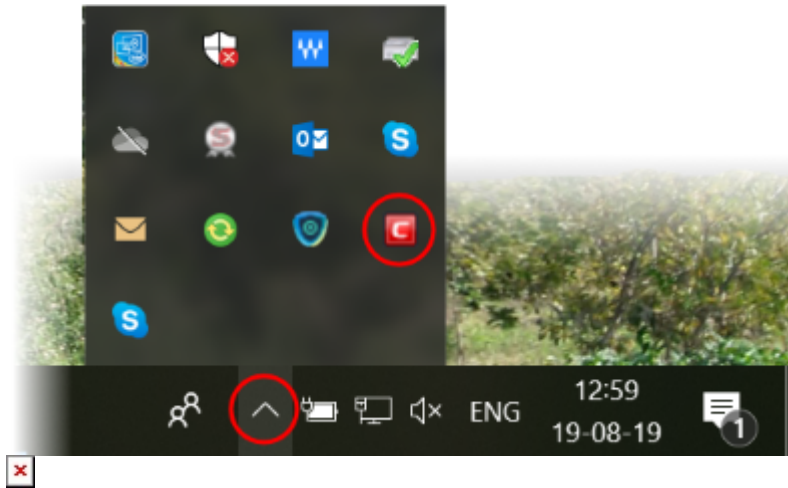

- Press the 'Windows' home key
- Select 'Comodo' > 'Comodo Client Security'

Note - the start menu varies slightly for different Windows versions.

### System tray icon

- Double click the CCS tray icon to open the main interface:

- You can also right-click on the tray icon and select 'Open...!.

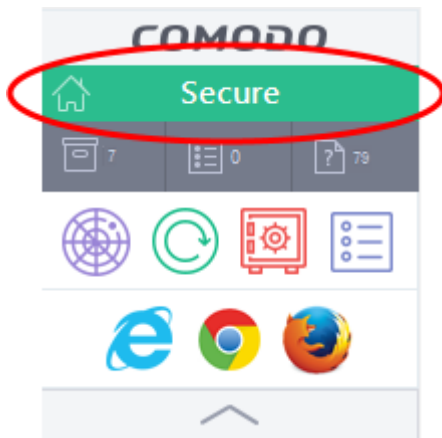

### Desktop shortcut

- Double-click the desktop shortcut to start Comodo Client Security.

### CCS Widget

- Click the information bar in the widget to start CCS.

### Windows Defender

- Double-click on the Windows Defender icon to open the application

OR

- Right-click on the tray icon and select 'Open...!.

- Click the 'Virus & threat protection' tile
- Click 'Open COMODO Antivirus' to open the Comodo Client Security interface:

Windows Defender Security Center

## Virus & threat protection

View threat history, scan for viruses and other threats, specify protection settings, and get protection updates.

### COMODO Antivirus

COMODO Antivirus is installed as an antivirus provider.

✔ No actions needed.
