

How to view the version numbers of Endpoint Manager platform and clients

Click 'Settings' > 'Support'

- The support page lists contact details to get help and support for Endpoint Manager through various channels.
- The page also shows the current version of the Endpoint Manager portal and the latest version of communication and security clients available for different operating systems.

View version information

- Login to Xcitium
- Click 'Applications' > 'Endpoint Manager'
- Click 'Settings' > 'Support'

The screenshot shows the 'Support' page in the Xcitium Endpoint Manager interface. The left sidebar contains navigation options, with 'SETTINGS' and 'Support' highlighted. The main content area is divided into three columns:

- Contact Information:** Lists support channels including telephone (+1 973 396 1232), email (support@xcitium.com), online support (www.xcitium.com/services/customer-support), forum (forum.xcitium.com), and help guide (help.xcitium.com).
- Supported Device Platforms:** Lists supported versions for Android (4.x to 12.x), iOS (7.x to 15.x), and macOS (11.x to 12.x).
- Latest Platform and Client Versions:** A table showing the latest version and release date for the Endpoint Manager server and various clients across different operating systems.

Latest Platform and Client Versions		
Endpoint Manager		
Server version	7.1.42814.22 070	2022/0 7/22
Windows
